PERSONAL PROJECTS

Video Calling/Chatting Application [↗](#)

- HTML , CSS , JS , DJANGO , WebRTC API
- A social networking site that allows you to video chat online is the primary inspiration for my project
- Here we can randomly select person those who are available in online.
- They can connect themselves with one chat and video calling also.
- Github Repository [↗](#)

Library Management System [↗](#)

- HTML , CSS , JS , DJANGO
- Here admin can manages and stores books information electronically according to students needs and also can manage student library information also.
- The system helps both students and library manager to keep a constant track of all the books available in the library. It allows both the admin and the student to search for the desired book.
- Github Repository [↗](#)

Quiz Application [↗](#)

- HTML , CSS , DJANGO
- Here any teacher can register .After registration admin will verify the teacher's identity .The teacher can create any kind of quiz in any subject.
- Here any student also can register and give their quiz. Also they can see their marks they got in the exam.
- Github Repository [↗](#)

Everyday Work Tracker [↗](#)

- HTML , CSS , JS , DJANGO
- Specially built to keep track of errands or tasks that need to be done . This application will be like a task keeper where the user would be able to enter the tasks that they need to do. Once they are done with their tasks they can also remove them from the list.
